USER ACCESS CALLS:

FUNDING POSSIBILITIES

Harness the power of cutting-edge research infrastructures and services in Austria and Europe

FUNDED BY
HORIZON EUROPE
VIA EURO-BIOIMAGING, ERIC

OPEN CALLS.

TNA programs are a very new type of funding opportunities that is dedicated to providing support to researchers/industry that need access to cutting-edge research infrastructures across Europe.

- 1 ISIDORE** (<https://isidore-project.eu>)
Funds access to cutting-edge research infrastructures, including imaging for **infectious disease research**.
- 2 CanSERV** (www.canserv.eu)
Funds access to cutting-edge, interdisciplinary oncology services across the entire **cancer** continuum.
- 3 AgroSERV** (<https://agroserv.eu>)
Funds access to research installations for research in the field of **agro-ecosystem** biodiversity and climate change adaptation.

YOUR BENEFITS.

All scientists regardless of their affiliation, area of expertise or field of activity are able to access cutting-edge facilities, equipment, and resources that they do not have access to in their institutions or at a national level.

- ✓ **Free choice of services**
Browse catalogues offering a wide range of cutting-edge services, including imaging technologies
- ✓ **Free and seamless access**
Funding access costs, consumable, and costs for expert support at hosting research infrastructure across Europe
- ✓ **Free short-term use**
Funding for traveling and access to imaging facility services and research infrastructure for < 3 months.

HOW TO APPLY.

Step 0 Consultation

Austrian Bioimaging/CMI and Euro-Bioimaging offer the option to support you in finding the right technology and facility for your research project.

Step 1 Submission

On the program website, select your desired service(s) and submit a proposal. The program evaluates the proposal based on scientific merit through independent peer review.

Step 2 Feasibility check

The technical feasibility of your project will be directly approved by the scientists operating the desired research infrastructure or services.

Step 3 Access

You can access the research infrastructure(s), and the program covers the costs incurred, which are paid directly to the service provider.
